

Wyoming-Montana Water Science Center

Who are we? The science agency of the U.S. Department of Interior tasked with providing impartial information about the Nation's natural resources. We work primarily on water-related issues in Wyoming and Montana.

What do we do? Collect surface-water, groundwater, water-quality, and stream ecology data and conduct water-related scientific investigations.

Now Hiring

We're now hiring a **Student Intern (Career)** in Helena, MT as part of our Surface Water/Hydraulics unit. The student will work on surveying, cableways, bridge scour, and sediment transport projects, and on other hydrology and hydraulics studies. Field work can be physically demanding and watercraft skills are desired. Students seeking Graduate Degrees in **Civil Engineering, Earth Sciences, or similar fields** will be considered. This internship could lead to a permanent position in Helena or Cheyenne, WY.

For more information about USGS student internships, go to:

<http://www.usgs.gov/humancapital/sw/studentinterns.html>

For information about the specific position being offered go to:

<https://www.usajobs.gov/GetJob/ViewDetails/496032200>

Apply Between now and April 16, 2018

We offer flexibility in the required hours while a student is completing their degree program and telework is an option during the school year. So even students enrolled in colleges or universities far from Helena will be strongly considered, but will be expected to work from Helena during summer breaks.
